Basic

- List all the unique teams that have played in the IPL.

- Find the total number of matches played in each season.

- Get the top 5 venues where the most matches were played.

- Find the number of matches each team has won.

- Get the player with the most "Player of the Match" awards.

- List all seasons in which a specific team participated.

- Find the total number of matches that ended in a tie or no result.

Intermediate

- Find the batsman who has scored the most runs overall.

- Find the bowler with the most wickets in IPL history.

- List the top 10 batsmen with the highest strike rate (minimum 200 balls faced).

- Find the team with the highest average runs per match.

- Compare win percentage when batting first vs chasing.

- Find the bowler with the most maiden overs in IPL history.

- Identify the batsman with the most sixes in a single season.

Advanced

- Find the batsman-bowler pair where the bowler has dismissed the batsman the most times.

- Find the top 5 matches with the highest total runs scored (both teams combined).

- Identify the most consistent batsman by calculating batting average across seasons.

- Find the bowler with the best economy rate in death overs (16–20).

- Identify which toss decision (bat/field) gives the highest win probability per team.

- Analyze how chasing scores above 180 affect the win percentage of each team.

- Find the player who has contributed the most in match-winning performances (combining runs and wickets).
